LONDON METROPOLITAN UNIVERSITY

PROFESSIONAL WORK PLACEMENT

LEARNING LOG 3

YOUR ID: **20048624**

YOUR NAME: **Aashish Baral**

YOUR COURSE: **Bsc (Hons) Computing**

YOUR WRL TUTOR: **Sandeep Gurung/Amar Khanal**

PLACE OF WORK (Company Name): **Aarambha IT Research Center PVT. LTD**

DATES OF ENTRIES IN LEARNING LOG: **1st February 2023 – 7th February 2023**

LEARNING LOG 3

For the period – 1st February 2023 **to** 7th February 2023

During the third week of my internship, I was tasked with designing the User Profile Page for the Flutter application **(LO7)**. Thanks to the training and skills development from the previous two weeks, I felt confident in my ability to complete the task efficiently. Like in the first and second week, I consistently arrived at the office on time. I greeted my supervisor and seniors in the office and followed throughout the whole week continuously. Well, one key skill that helped me complete the task in a short amount of time was effective time management. I planned my schedule and set achievable goals for each day, ensuring that I made progress on the task while still meeting other responsibilities and deadlines **(LO1, LO3, LO6)**.

In addition to time management, I continued to expand my knowledge of Flutter UI development by researching advanced techniques and customizing Flutter widgets **(LO4, LO7)**. I also applied the advice and recommendations from my seniors in the previous week to create reusable widgets, improving the efficiency of my work and saving time. I usually communicate with my seniors enhancing my capabilities regarding developing my programming skills which made my communication skills even better **(LO1, LO7)**.

Well, I encountered some challenges during the design process, but I used my problem-solving skills to find solutions quickly and effectively. I also sought guidance and support from my seniors, who provided valuable insights and advice on how to approach the task **(LO5)**.

By the end of the week, I had successfully completed the User Profile Page design on the given deadline, met all the requirements and achieved a high-quality result. I felt a sense of accomplishment and pride in my work, knowing that I had developed my skills and applied them effectively **(LO3)**.

Overall, the third week of my internship was a success, and I continued to learn and grow as an intern. I further developed my time management skills and expanded my knowledge of Flutter UI development, both of which will be valuable assets for me in the future.

What I did well (refer to skills used)

During my third week of internship, I found myself still requiring guidance from my supervisor and other senior colleagues to address various issues that arose. However, I also made a conscious effort to study more and attempt to troubleshoot problems independently before turning to them for assistance. This approach allowed me to identify problems more accurately and communicate more effectively with my superiors, ultimately contributing to the improvement of my logic and problem-solving skills, as well as my communication abilities.

Moreover, I made a point to maintain a positive and cheerful attitude throughout my workday. I regularly greeted my supervisor and colleagues with warmth and enthusiasm, creating a welcoming and friendly environment. This attitude not only helped to improve my own mood and morale, but it also had a positive impact on those around me. Overall, I believe that my efforts to enhance my skills and maintain a positive attitude have contributed to my growth and development as an intern, and I look forward to continuing to learn and improve throughout my time here.

What I could improve on (i.e., skills I want to improve)

I'm extremely pleased with the progress I've made in creating flutter UI designs as I enter the third week of my internship. I am conscious of the fact that there is still potential for improvement, particularly in terms of developing more complex and advanced flutter UI designs. I therefore intend to spend more time studying and practicing in order to improve my abilities in this field. Additionally, I am focusing on enhancing my technical knowledge and problem-solving abilities so that I can reduce the need for my seniors help. I am sure that if I keep working hard, I will be able to significantly advance toward the goals of the company and gain from the internship at the same time.

Similarly, I realize that being able to work things out on my own is just as important as knowing when to ask for assistance. By doing this, I can show that I can look out for myself and get the confidence I need to take on bigger projects and responsibilities.

Overall, I am excited to continue my internship experience and to grab every chance to advance both professionally and personally.

Action I can take to improve my skills and learning (make these "SMART"):

Technical Skills

Goal   **To Improve on Flutter UI development using more advanced designing concepts.**

Action   Researching more on Flutter UI development, surfing through the flutter docs and other research materials.

Timing   Starting from next internship week, **8th February 2023** and continuing to work on accordingly.

Logic and Problem-Solving Skills

Goal   **To Improve on problem finding whenever error encountered doing the task.**

Action   Researching on the problems and finding the best solution instead of approaching the seniors for the aid.

Timing   Starting from next day, **8th February 2023** and continuing to work on accordingly.
