LONDON METROPOLITAN UNIVERSITY

PROFESSIONAL WORK PLACEMENT

LEARNING LOG 5

YOUR ID: **20048624**

YOUR NAME: **Aashish Baral**

YOUR COURSE: **Bsc (Hons) Computing**

YOUR WRL TUTOR: **Sandeep Gurung/Amar Khanal**

PLACE OF WORK (Company Name): **Aarambha IT Research Center PVT. LTD**

DATES OF ENTRIES IN LEARNING LOG: **15th February 2023 – 23rd February 2023**

LEARNING LOG 5

For the period – 15th February 2023 **to** 23rd February 2023

What have I done? (relate tasks to Learning Outcomes)

During the fifth week of my internship, like the previous week, I arrived at the office on time for the respective week days, and greeted my supervisor and seniors accordingly. Well for the fifth week of my internship, I continued to work on testing the company project Hotel Booking App Flutter project with my colleagues, which was a crucial task as the project was almost at the completion phase. Our team was responsible for thoroughly testing every functionality of the hotel booking app and preparing a detailed testing table **(LO2, LO3)**.

To begin, we had another meeting with our supervisor to review the guidelines for team collaboration. We were then provided with the latest version of the hotel booking app and tasked with testing all of its new features and functions. Well, I took the lead in creating a testing document using Google Docs, where I documented both valid and invalid testing scenarios for each function of the app **(LO2)**.

Throughout the week, our team discovered several bugs and design issues that required our attention. We held fruitful discussions where we shared our individual suggestions for improving the app's user-friendliness and overall design. I made sure to document my own insights in detail so that our team could refer to them later **(LO1, LO2)**.

Overall, I believe that this week was a success, as I continued to expand my knowledge of Flutter UI development and time management skills. I am confident that these skills will serve me well in my future endeavours.

What I did well (refer to skills used)

As my internship has progressed, my communication skills have continued to improve. I have become more confident in addressing any issues that arise and working collaboratively with my colleagues and seniors to resolve them. My ability to provide constructive feedback and take feedback from others has also improved, which has been valuable in ensuring that our team works together effectively. Along with my

communication skills, my teamwork skills have also continued to improve. I have learned how to balance my own responsibilities with contributing to the team's overall success. I have also demonstrated a willingness to take on new challenges and contribute ideas that have helped to move the project forward.

Overall, I am pleased with my progress and look forward to continuing to develop these important skills throughout my internship.

What I could improve on (i.e. skills I want to improve)

As I reflect on my fifth week of internship, I realise that while I have made significant progress in improving my communication and teamwork skills, there is still room for improvement in my technical skills. In particular, as our team continued to work on the testing of the hotel booking app project witnessing all the UI designs along with the respective app features and functionalities, I recognized that my proficiency in implementing Flutter development was not yet where I wanted it to be.

As a result, I have identified the need to focus more on improving my technical skills going forward. To achieve this, I plan to take a proactive approach in seeking out opportunities to learn more about Flutter development and other technical skills relevant to our project. I also plan to ask for feedback and guidance from my seniors and colleagues to identify areas where I can improve my technical skills.

Well, I am dedicated to utilising my internship experiences as an opportunity to enhance my technical proficiency, communication, and teamwork skills. I am confident that by prioritising these areas, I will be able to make a valuable contribution to any project I am involved in moving forward.

Action I can take to improve my skills and learning (make these "SMART"):

Technical Skills

Goal   **To further improve my technical skills in Flutter Development**

Action   Continuing to seek guidance from senior developers and researching new techniques in Flutter UI development. Additionally, I will dedicate at least two hours each day to practising my skills by working on my own projects and following tutorials. I will also seek feedback from my supervisor and colleagues to identify areas where I can improve.

Timing   Starting from next internship week, **24th February 2023** and continuing to work on accordingly.
